Kansas Board of Barbering Barber License Examination Practical Examination Directions and Procedures

Below are directions and procedures for the practical portion of the barber license examination. This information will be included in the schedule letter sent to all barber examinees prior to the examination date. This information is being provided as an aid to preparation for the exam.

- The straight razor shave must be performed on the tapered cut model. Grade points will be deducted for noncompliance of this item.
- All aspects of the tapered and the trend haircuts are graded by the examiners. This includes the front; top; back; right side; left side; and the outline of the two types of haircuts. The tapered haircut must be markedly different from the trend haircut. Grade points will be deducted for noncompliance of this item.
- The two (2) models must have a full head of hair and be in need of a haircut. The Board has established that the model's hair should be approximately 3" long prior to the haircut. The model used for the taper haircut must have visible beard growth for the shave. Grade points will be deducted for noncompliance of these aforementioned items.
- An edger or a straight edge razor must be used by the examinee when performing the outline on the taper model.
- Perm rods may be rolled and wrapped on either the taper or the trend model. (This decision is designated to the examinee's choice.)
- The examiners will grade on professional conduct; hygiene; and observance of all sanitation regulations. Your appearance and dress should be such that is compared to a job interview in a professional barbering establishment.

Please see the practical procedural steps listed and continued on the next page.

Barber Examination
Procedures – All Services Must Be Provided

You may place these instructions on the back bar during your practical examination to ensure that procedures are followed in order.
